

Japanese physicists working together at CERN

COMPASS at SPS (2001-)

Nagoya, Miyazaki and Yamagata Univ. studying hadron structure with high intensity muon/hadron beams at SPS.

OPAL at LEP (1989-2000)

Univ. of Tokyo and Kobe participated at LEP. Precision measurements of Z bosons and W pairs, proving the Standard Model with high precision.

ASACUSA at AD (2000-)

Univ. of Tokyo and Riken studying precision physics of anti-hydrogen atoms using stopped anti-protons.

ATLAS at LHC (under construction)

15 Institutes (KEK, Tsukuba, Tokyo, Shinshu, Kobe, Okayama.....), constructing Solenoid, Endcap Muon trigger system and Silicon tracker.

CHORUS at PS (1993-1997)

Nagoya, Toho, Aichi, Kobe and Utsunomiya Univ. searched neutrino oscillation at West area.

OPERA at CNGS (under construction)

Nagoya, Toho, Aichi, Kobe and Utsunomiya Univ. searching tau-neutrino appearance in Gran Sasso.
